# NOTE

## Embracing *Spring Hues*

When it comes to using spring color palettes in your home, there are a few key things to keep in mind. First and foremost, it's important to remember that **these palettes are meant to be used as a starting point** – so don't feel like you need to use every single color in the palette. Instead, focus on using a few key colors that you feel will work well together.

Another important thing to keep in mind is that you don't necessarily need to use spring colors all throughout your home.

In fact, you might find that using them in just one or two rooms – such as your living room or dining room – can actually make a big impact. So if you're not sure where to start, consider using spring colors in these areas.

Finally, when it comes to using spring color palettes in your home, it's important to have fun with it. This is your chance to experiment with different colors and create a space that truly reflects your personal style. So don't be afraid to take some risks and have fun with it!
